

## About us

Dynamic Community Care, a registered Indigenous Business, is dedicated to fostering community growth and sustainable futures. By valuing and upholding mobs' cultural traditions, values, and influences, we ensure our service users receive care that aligns with their culture. With culture at our core, we create opportunities for brighter futures, supporting Child Protection and NDIS services. Our flexible approach acknowledges the unique differences among children, young people, and communities. Utilising "The Trauma Recovery Model," we address the complex needs of our most vulnerable individuals. Operating throughout Queensland, we actively seek opportunities across Australia to enhance the lives of children, young people, First Nations people, and individuals with disabilities

# Our Services :

## Residential Care

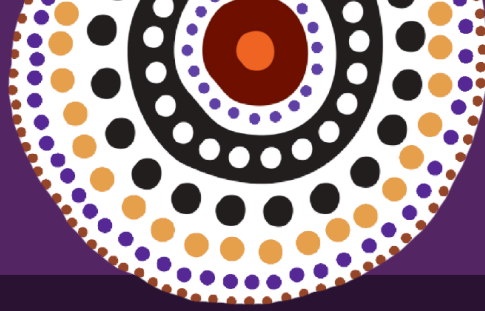

We provide safe, trauma-informed care for children and young people in non-family-based settings under child protection orders. Our programs incorporate the Trauma Recovery Model, emphasising culturally appropriate connections and a highly skilled therapeutic workforce.

## Outreach Support

We offer outreach services to children, young people, families, and the community, helping them achieve transition goals and maintain stable family-based placements. Our focus is on building skills and capacity, creating opportunities for brighter futures. We recognise that some young people face challenges in maintaining stable residential placements, making them more vulnerable to systemic gaps.

## NDIS

We offer comprehensive support and services to individuals with disabilities, promoting equal opportunities and independence. Our assistance encompasses personal and NDIS goals, including skill development, education access, employment support, and daily living tasks. Through a strengths-based approach, we prioritise health, well-being, and choice, empowering participants to lead fulfilling lives.

At Dynamic Community Care, we dare to discuss the unspoken and challenge the social expectations to achieve best outcomes for all individuals. We provide services that demonstrate their flexibility, agility, and willingness to face challenges and the complex needs of all individuals. We strive to enhance social justice, freedom, and acceptance while powering brighter futures for individuals in their communities and celebrating culture, diversity, and individuality

# Our Mission & Our Vision

## Transition to Adulthood

We empower young people in care during their transition to adulthood by providing tailored strategies and assistance. Through Transition to Adulthood meetings, we identify areas requiring support, help develop essential skills, and connect them with resources to achieve independence.

## Supervised Family Contact

We offer supervised family contact/connection services nationwide, aiming to include remote and rural communities to preserve culture, connections, and access for children and young people. Our flexible approach accommodates various environments, such as secure office locations, parks, kids' play venues, family homes, beaches, local PCYCs, pools, and family-friendly restaurants.

## Assessments

We partner with industry colleagues to assess and meet the placement needs of children and young people in care. Our specialization includes developing training and support plans for trauma-informed strategies. Our assessments cover foster care, behavioral, cultural, training, transitional, and family contact.
